

# 4S CenterPoint B

The 4S CenterPoint B is a CenterPoint Standalone Air Purifier used to reduce the levels of Volatile Organic Compounds (VOC's) and viable airborne biological contaminants. The unit may be utilized as a portable "point-of-use" air purifier or may be permanently mounted above the ceiling tile. The B uses (1) to (4) 4S CenterPoint 2021 PCP.

Proven technology to disinfect, deodorize, and filter air.

## CenterPoint Technology

### Step 1: MERV 13 Filtration...

Reduces particles you can't even see. New high efficiency, high capacity, low resistance particle filter reduces most pollen, mold, mildew, ragweed, dust, house dust, bacteria, pet dander, and many other submicroscopic poisons, allergens, and irritants.

\* Based on 3 ACH in a room with a 10 ft. ceiling.

### Step 2: UVGI Lamps...

CenterPoint uses ultraviolet light to activate the photocatalyst, which reduces and deactivates air borne bacteria, viruses, mold, spores, and fungi.

### Step 3: Photocatalyst...

Using Titanium Dioxide energized by UV light, 4S CenterPoint panel, produces hydroxyl radicals. Hydroxyl radicals are a natural cleansing agent found in the troposphere. Hydroxyl radicals reduce and oxidize biologics in the air, such as mold bacteria, and viruses, thus rendering them nonviable. CenterPoint safely and effectively neutralize biologics and reduces concentrations of VOCs.
